# Programming Test

Requirement:

Build a small iOS app with the following functionalities. You can use React Native, JavaScript, CSS, and other necessary programming languages.

1) Load, play and pause music
2) Load Lyrics
3) Automatic Lyrics-to-Audio Alignment (basically scroll down and highlight the line of lyrics as the music plays)

Bonus point:

1) Jump to the position in the music when clicking on the lyrics, and vice versa
2) Enable to edit the lyrics
3) Any other functionality you feel like to do

Delivery:

1) Finish as much as you can before the deadline.
2) Post your code and screen shot to GitHub.
3) Send the GitHub URL to info@laxis.tech

Dead line:

Please submit your project by the end of Friday 10/16.

How we evaluate:

1) Functionality
2) Code quality
3) UI Design
